

Identification

Records identified via AI-assisted
deep research model mining of
full-text databases
(PubMed, Academic Search Complete)
n = 11

*AI-assisted deep research model
bypassed traditional title /
abstract screening phase*

Eligibility

Full-text articles assessed
for eligibility
k = 11

Full-text articles excluded (k = 7)

- Incorrect Metric / Not measured
in mg/cm² (k = 4)
 - Incorrect Intervention /
Layering with makeup (k = 1)
- Incorrect Outcome / Measuring
time instead of quantity (k = 1)
 - Incorrect Study Design /
In vitro instead of in vivo (k = 1)

Included

**Studies included in
quantitative synthesis
(Meta-Analysis)
k = 4 studies
(N = 116 participants)**
